

Agenda for Global Registries Initiative Meeting

Washington DC December 8th 2008

Renaissance Hotel, Washington DC
0800-1200

1. Overview

An initiative for a global network of registries

2. Usage Scenarios

Four example usage scenarios of a global network of registries of research materials:

- PhD candidate conducts a review of data collections
- Research leader remains up to date on new materials
- Senior academic administrator browses for research collaboration opportunities
- Web applications developer creates complex machine to machine interaction

3. Demonstrators

1. ANDS Collection Registry global pilot

<https://devel.apsr.edu.au/cosi/orca/search.php>

2. LibraryFind global pilot

<http://apollo.library.oregonstate.edu:3001/record/search>

4. Implementation Options

Overview of some high-level level technical and organisational options for approaching implementation

5. Toward a Global Registries Cooperative

Discussion of the way ahead

Proposal: Pursue coordination of existing NSDL, JISC, and NCRIS registry efforts and expand the collaboration where possible.

Proposal: Establish two joint working groups with agenda and timetable:

- I. Technical
- II. Organisational

Proposal: Progress the Global Registries Demonstrator
